

CE 890 Graduate Seminar

- DATE:** October 15, 2008
- TIME:** 4:00 p.m. (refreshments served at 3:45 p.m.)
- PLACE:** Durland 1052
- SPEAKER:** Jason Eichenberger, Distance Learning M.S. candidate
- TOPIC:** "Civil Engineering: From KSU to Burns & McDonnell"

ABSTRACT

The presentation will cover the organization of Burns & McDonnell, the types of projects their Energy-Civil department is involved with, and the courses that I have taken for my graduate degree and how those courses have helped prepare me for my career as a consultant in the power industry. I will provide examples of a few projects that I have worked on, including studies and design projects involving river intake structures, site layout and storm drainage design for both coal-fired and nuclear power plants, collector well construction, and landfill construction.
